## Market Performance

The average Uniform Singapore Energy Price (USEP) and Wholesale Electricity Price (WEP) in Q1 2011 saw little movement over Q4 2010. Both USEP and WEP declined less than 1 percent to \$169.22/MWh and \$170.63/MWh in Q1 2011 from \$169.88/MWh and \$171.30/MWh in Q4 2010 respectively. Meanwhile, the Vesting Contract Hedge price (VCHP) rose 4.1 percent from \$165.56/MWh in Q4 2010 to \$172.36/MWh in Q1 2011.

Prices for ancillary services fell across the board. Regulation price saw a steep decline of 40 percent to \$54.60/MWh in Q1 2011 from \$90.75/MWh in Q4 2010.

The average High Sulphur Fuel Oil (HSFO) spot price advanced 11 percent to US\$84.24/barrel from US\$76.02/barrel while average forecast demand declined 3.1 percent to 4,891MW for the same period. As a result of lower average forecast demand, the supply cushion rose 0.7 percentage points.

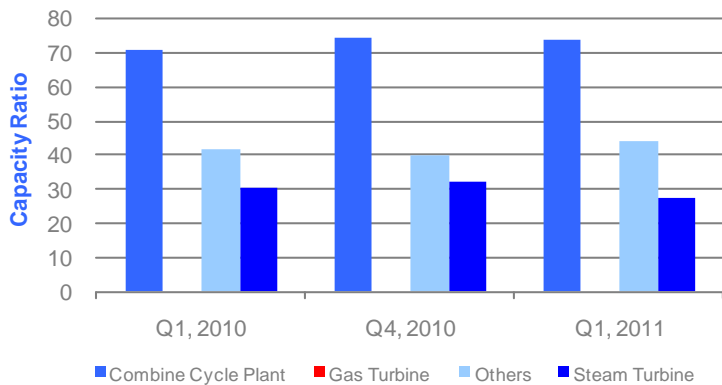

Lower average forecast demand and higher supply cushion helped to offset the increase in HSFO spot price, resulting in a lower average USEP in Q1 2011.

Planned outage volume in Q1 2011 declined 31 percent compared to Q4 2011 while unplanned outage volume increased 2.3 times to 434,021MWh in Q1 2011. At the same time, forced outage volume also increased 2.6 times to 59,199MWh. In all, total outage volume decreased 18% in Q1 2011. The effect of lower total outage volume can be seen in an increase in the percentage of lower priced offers made at and below \$100/MWh.

No price spike above \$1,000/MWh was observed in Q1 2011.
