Notice of Market Rules Modification

Paper No.: EMC/RCP/40/2008/275
Rule reference: Chapter 2 Section 5.1.4 App 2B Section B.1.1 and Chapter 8
Proposer: Yeo Lai Hin, PSO
Date received by EMC: 13 March 2008
Category allocated: 1
Status: Approved by EMA
Effective Date: 05 January 2009

Summary of proposed rule modification:

The proposal seeks to clarify that any generating unit resides at a generating station which has an aggregate capacity of 10 MW or more must be registered as generation registered facility and subject to the PSO’s dispatch.

The Application Form for Generation Facility Registration (i.e. Market Administration Market Manual (Part 2)) is amended to clarify that the 10MW threshold applies to the aggregate nameplate rating at generating station. EMC has also proposed some changes to update this form because it has not been updated since market start.

Date considered by Rules Change Panel: 4 November 2008
Date considered by EMC Board: 27 November 2008
Date considered by Energy Market Authority: 19 December 2008

Proposed rule modification:

See attached paper.

Reasons for rejection/referral back to Rules Change Panel (if applicable):
Executive Summary

This rule modification proposal amends the rules to clarify the circumstances under which generation facilities must be registered for central dispatch. It clarifies that any generating unit at a generating station with an aggregate capacity of 10 MW or more must be subject to the PSO’s dispatch.

Amendments to the Market Administration Market Manual are also proposed for consistency with the proposed new rules.

The RCP recommend that the EMC Board adopt this proposal.
1. Introduction

This paper assesses the PSO's rule modification proposal to clarify the requirements for registration of generation settlement facilities (GSF) and generation registered facilities (GRF).

2. Background

In the SWEM, two types of generation facilities participate in the market: generation settlement facilities (GSF) and generation registered facilities (GRF).

GSFs are not required to be subject to the PSO's dispatch and can generate according to their needs. Under the existing rules, a generation facility with a nameplate rating of less than 10 MW can be registered as a GSF.

A generation facility is defined as "one or more generating units at the same physical location." For the purpose of determining if a generation facility is required to be subject to dispatch, the generation facility's nameplate rating should be the aggregate nameplate rating of all the generating units at the same physical location. If the aggregate rating of the generating units at the same physical location is 10 MW or more, then such generating units shall be subject to the PSO's dispatch.

However, the current rules did not adequately articulate the intent to aggregate the nameplate ratings of all the generating units at the same physical location, which forms a generation facility, when determining if that generation facility should be subject to dispatch. Because every generating unit has a nameplate rating, some market participants have inadvertently misunderstood that the 10MW threshold applied to each generating unit's individual nameplate rating.

3. Analysis

3.1 Problem with Multiple GSFs located together

GSFs are not scheduled by the Market Clearing Engine (MCE) and hence do not follow any dispatch instruction. The operation of several GSFs together at the same physical location could have a significant impact on the power system.

For example, if these GSFs stop generating and start to import from the transmission grid for any reason, the MCE would not factor that in and schedule additional generation accordingly. This would deplete the reserves provided by other on-line generation facilities in the power system, resulting in insufficient reserve in the power system to cater for the tripping of the largest on-line generation facility. The result would be an adverse impact on the security of the power system, possibly leading to partial blackout in Singapore if the largest generating facility trips.

3.2 Clarification Required

To avoid the problem above, the Market Rules intended to set a 10MW threshold on the capacity of any GSF at a given location. This is to ensure that the level of generation from GSFs in the system stays within an acceptable level that would not pose a threat to system security.

When the 10MW threshold (which is intended to encompass the aggregate of the nameplate ratings of all generating units at the same physical location) is interpreted as the threshold level for the individual nameplate rating of each generating units, it would mean that multiple generating units (rated below 10MW individually, but more than 10MW in aggregate) at the same physical location can be registered as multiple GSFs. This exceeds the intended
tolerance level. Thus, it is necessary to make it explicit in the Market Rules that multiple generating units at the same physical location, which together have an aggregate nameplate rating of 10MW or more, must be subject to the PSO’s dispatch and thus registered as one or more GRFs.

4 Proposed Rule Changes

4.1 Proposed Changes to the Market Rules

The following types of changes are required to the Market Rules:

a) Explicitly state in the facility registration rules that the 10 MW threshold for capacity refer to the aggregate nameplate rating of all generating units at the same physical location;

b) Replace the term "physical location" with "generating station" in the definition of generation facility. The term "physical location" is ambiguous. We propose using "generating station" instead, which is commonly understood by market participants;

c) Make clear that Appendix 2B (technical requirements for registration of facilities) will apply to the registration of GRFs as well as GSFs; and

d) Make associated changes to the Application Form for Generation Facility Registration

A summary of the proposed rule changes is provided in Table 1 below:

Please refer to Annex 1 for full details of the proposed rule changes described in Table 1 and Table 2.

### 4.2 Proposed Changes to the Application Form for Generation Facility Registration

The Application Form for Generation Facility Registration (i.e. Market Administration Market Manual (Part 2)) is amended to clarify that the 10MW threshold applies to the aggregate nameplate rating at generating station. EMC has also proposed some changes to update this form because it has not been updated since market start. The proposed changes to the form are summarized in Table 3 below. Please refer to Annex 2 for the proposed new form and Annex 3 for the details of the changes made to the current form.

</tbody>
</table>

5. **Conclusion**

We conclude that:

a) the proposed rule changes would make the registration requirements for GSF clearer to market participants; and
b) the proposed modifications to the market manual would make the application form more relevant and consistent with the registration rules.

5. Impact on market systems

There is no change required to market systems.

6. Implementation process

This rule modification proposal can take effect immediately after EMA’s approval at no extra cost.

7. Consultation

We have published the rule modification proposal on the EMC website for comments. No comments have been received for consideration.

8. Legal sign off

Text of the rule modification in Annex 1 and the proposed revised form in Annex 2 has been vetted by EMC’s external legal counsel whose opinion is that the modification reflects the intent of the rule modification proposal as expressed in the analysis section of this paper.

9. Recommendations

The RCP unanimously recommends that the EMC Board

a. adopt the rule modification proposal to amend Chapter 2, and Appendix 2B of Chapter 2 and Chapter 8 as set out in the Annex 1;

b. adopt the proposed revised Market Administration Market Manual (Part 2) as set out in the Annex 2;

c. seek EMA’s approval of the modification proposals as set out in Annex 1 and Annex 2; and

d. recommend that the modification proposals as set out in Annex 1 and Annex 2 come into force one business day after the date on which the approval of the Authority is published by the EMC.

ANNEX 2  Proposed Modification to the Market Administration Market Manual (Part 2) (Clean Version)
Application form for Generation Facility Registration

including explanatory notes
IMPORTANT: Please read this carefully before completing this form. Italicised words and expressions used herein (but not otherwise defined herein) shall have the same meanings respectively ascribed to them in the Singapore Electricity Market Rules.

Why do you need to complete this form?
Under the market rules, if you are not a market support services licensee, you are not permitted to participate in the real-time markets or to cause or permit any physical service to be conveyed into, through or out of the transmission system unless you have been registered by the EMC as a market participant, and your facility to or from which the physical service is to be so conveyed has been registered by the EMC as a registered facility, a commissioning generation facility or as a generation settlement facility in accordance with the market rules.

The EMC is licensed by the Energy Market Authority (the Authority) to operate the wholesale electricity markets (to which the real-time markets form a part) in Singapore. One of the EMC’s responsibilities is to manage the registration of facilities in the wholesale electricity markets. You must complete and submit this form to apply to have a facility registered by the EMC if you wish to convey any physical services into, through or out of the transmission system and that facility is required or permitted to be registered under the market rules.

Why did EMC develop this form?
The EMC has developed this form for applicants to apply for the relevant facility registration described in the market rules. You should read the relevant sections of the market rules prior to completing this form. Please also read the EMC disclaimer at the end of this form.

Who is eligible to apply for registration?
You must be registered as a market participant before you are eligible to apply for registration of your facilities.

If you are only granted conditional registration as a market participant, you may also apply for registration of your facilities, but your facilities will not be registered unless you become registered as a market participant within the relevant conditional registration deadline.

What are the types of facility registration?
The three types of registered facilities are:

- Generation registered facility
- Generation settlement facility
- Commissioning generation facility (you need to complete a separate form for this type of registration).

This application form is to be used for application for registration of either a generation registered facility or a generation settlement facility only. If you wish to register your facility as a commissioning generation facility, please use the Application Form for Commissioning Generation Facility Registration.

Generation Registered Facility

If all the generation facilities of a generating station together have an aggregate name-plate rating of 10 MW or more, all such generation facilities must be registered as either a single generation registered facility or two or more generation registered facilities in accordance with the market rules. A generation registered facility is subject to dispatch by the PSO. A generation registered facility shall at all times have a valid standing offer for each physical service that it intends to provide in the real-time markets.

Generation Settlement Facility

A generation settlement facility is registered for the delivery of energy only and is not subject to dispatch by the PSO. If all the generation facilities of a generating station together have an aggregate name-plate rating of 1 MW or more but less than 10 MW, all such generation facilities must be registered as either a single generation settlement facility or two or more generation settlement facilities in accordance with the market rules. But if any of such generation facility is to be subject to dispatch by the PSO, that generation facility must be registered as a generation registered facility instead.
When will you know the outcome of your application?
The EMC will notify you in writing of the outcome within 30 business days of the EMC being satisfied that your application meets all the requirements for generation facility registration under the market rules, the applicable market manuals and the system operation manual. If your application is declined, the notification will identify why this was the case. A duly and accurately completed form will expedite EMC’s processing of your application.

What should you do if you have more than one facility to register?
Please fill in a separate form for each application for registration of a generation registered facility or generation settlement facility. You can download additional copies of the form from the EMC website at www.emcsg.com.

Is there an application fee for your application to register your facility?
There is no application fee payable for your application to register your facility.
Summary of registration requirements for a generation registered facility

The key requirements in the process for the registration of your facility as a generation registered facility are outlined in the table below:

| A | Meet the EMC's requirements | You must be sure that:  
|   |                           | • your facilities and equipment meet all applicable technical requirements set forth in the market rules, any applicable market manuals or the system operation manual; and  
|   |                           | • you are able to perform all the functions and obligations applicable to you under the market rules, market manuals or system operation manual.  
|   |                           | If your facility is located outside of Singapore, the EMC may impose additional requirements for the registration of your facility. |
| B | Meet the PSO’s requirements | • You must complete the PSO’s Data Form for Generation Facility Registration, meeting all the applicable technical requirements and attaching any required documents during submission.  
|   |                           | • The registration of your facility is subject to the PSO advising the EMC that such facility poses no threat to the reliability or security of the PSO controlled system. |
| C | Meet metering requirements | You must secure the MSSL’s written confirmation to the EMC that the MSSL is ready to submit all settlement data required under the market rules for your facility to the EMC. |
| D | Prepare and attach required documents | You must duly complete this application form in respect of your facility and provide all required supporting documents with your application, including the following:  
|   |                           | • A certified true copy of your duly executed connection agreement with the transmission licensee for your facility.  
|   |                           | • A certified true copy of your duly executed market participant - market services support licensee agreement with the MSSL for your facility.  
|   |                           | • An original duly completed Data Form for Generation Facility Registration required by the PSO (as set out in Appendix C of this application form) for your facility.  
|   |                           | • An original duly completed and executed Certificate and Undertaking (in the form and terms prescribed in Appendix B of this application form) for your facility. |
| E | Standing Offer Data | You must comply with section D. |
| F | Registration as a generation registered facility | Your facility will be registered as a generation registered facility if the EMC is satisfied that your facility meets all the requirements for such facility registration under the market rules, the applicable market manuals or the system operation manual. The EMC will notify you of the terms and conditions of the registration in an official notice to you. If your application is declined, the EMC will write to you stating the reasons. |
### Summary of registration requirements for a generation settlement facility

The key requirements in the process for the registration of your facility as a *generation settlement facility* are outlined in the table below:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| **A** Meet the *EMC’s* requirements | You must be sure that  
- your facility meets all applicable technical requirements set forth in the *market rules*, any applicable *market manuals* or the *system operation manual*; and  
- you are able to perform all the functions and obligations applicable to you under the *market rules*, *market manuals* or *system operation manual*.  
If your facility is located outside of Singapore, the *EMC* may impose additional requirements for the registration of your facility. |
| **B** Meet the *PSO’s* requirements |  
- You must complete the *PSO’s* Data Form for Generation Facility Registration, meeting all the applicable technical requirements and attaching any required documents during submission.  
- The registration of your facility is subject to the *PSO* advising the *EMC* that such facility poses no threat to the *reliability* or *security* of the *PSO controlled system*. |
| **C** Meet metering requirements | You must secure the *MSSL*’s written confirmation to the *EMC* that the *MSSL* is ready to submit all settlement data required under the *market rules* for your facility to the *EMC*. |
| **D** Prepare and attach required documents | You must duly complete this application form in respect of your facility and provide all required supporting documents with your application, including the following:  
- A certified true copy of your duly executed *connection agreement* with the *transmission licensee* for your facility.  
- A certified true copy of your duly executed *market participant - market services support licensee agreement* with the *MSSL* for your facility.  
- An original duly completed Data Form for Generation Facility Registration required by the *PSO* (as set out in *Appendix C* of this application form) for your facility.  
- An original duly completed and executed Certificate and Undertaking (in the form and terms prescribed in *Appendix B* of this application form) for your facility. |
| **E** Registration as a *generation settlement facility* | Your facility will be registered as a *generation settlement facility* if the *EMC* is satisfied that your facility meets all the requirements for such facility registration under the *market rules*, the applicable *market manuals* or the *system operation manual*. The *EMC* will notify you of the terms and conditions of the registration in an official notice to you. If your application is declined, the *EMC* will write to you stating the reasons. |

---

**How can you find more information?**  
In addition to this form and the *market rules*, you may obtain more information by contacting the *EMC Market Administration Team* by telephone +65 6779 3000. Alternatively, you may visit the *EMC* website at [http:www.emcs.org](http:www.emcs.org).
Please print clearly. Illegible writing or incomplete forms may delay the processing of your application.

A. APPLICANT DETAILS

Name of applicant: ________________________________________________________________

Company registration number: ______________________________________________________

Registered Address: __________________________________________________________________

B. REGULATORY DETAILS

1. Authorised activities relating to electricity under your electricity licence(s)?
   Note: You may check one or more of the following boxes indicating the type of activities authorized under your electricity licence(s)
   - [ ] generate electricity
   - [ ] retail electricity
   - [ ] transmit electricity
   - [ ] transmit electricity for or on behalf of a transmission licensee
   - [ ] import electricity
   - [ ] export electricity
   - [ ] trade in wholesale electricity market

   Electricity licence number(s) _________________________________________________________
   State activities exempted from licensing requirement_________________________________________
   Exemption order number_______________________________________________________________

2. What type of facility registration are you applying for?
   - [ ] generation registered facility
   - [ ] generation settlement facility

3. Derogation requested  [ ] Yes  [ ] No

4. Wholesale Electricity settlement account number: _________________________________

C. FACILITY DETAILS

5. Name of the facility: _____________________________________________________________

6. Name of owner of the facility: ____________________________________________________

7. Location of the facility: __________________________________________________________
   ______________________________________________________________________________
8. **Meter ID number(s)**
   ______________________
   (Please also complete Appendix A of this application form.)

9. **Dispatch coordinator for the facility:**
   ______________________
   (for registration of *generation registered facility* only)

10. **Contacts of the dispatch coordinator for the facility:**

<table>
<thead>
<tr>
<th></th>
<th>Main Contact</th>
<th>Alternate contact</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full Name &amp; Designation</td>
<td></td>

</tr>
</tbody>
</table>

11. **Physical service intended to be provided from the facility:**

   - Energy ☐
   - Reserve ☐ (Primary ☐ Secondary ☐ Contingency ☐)
   - Regulation ☐

   (In the case of a facility to be registered as a *generation settlement facility*, please tick energy only.)

12. **Other authorisations/approvals granted by the Authority**

   - Authorisation for classification of your facility as an embedded *generation facility* for the purposes of (USEP+HEUC)/Nodal Price Neutralisation ☐ Yes ☐ No
   - Approval for classification of your facility as a *non-injecting generation facility* for the purposes of net treatment on non-reserve charges ☐ Yes ☐ No

   (If yes, please provide a copy of the Authority’s written authorisation or approval as the case may be.)

**D. STANDING OFFER DATA**

(This section is only applicable if your facility is to be registered as a *generation registered facility.*)

Please provide a *standing offer* for each *physical service* to be provided from your facility to be registered as a *generation registered facility*. Each such *standing offer* for your facility must be submitted to the EMC in the data format required by and in accordance with the EMC’s Market Operations Market Manual on Standing Offers, Offer Variations and Standing Data (Chapter 6 Market Rules).
E. GENERATION FACILITY REGISTRATION
( FOR SUBMISSION TO THE PSO)

Please complete the PSO Data Form for Generation Facility Registration which is attached as Appendix C of this application form. All relevant sections in the form must be duly completed. The duly completed form must be sent to the EMC together with all supporting documentation.

F. CHECKLIST OF SUPPORTING DOCUMENTS REQUIRED

You must attach the following documents to your application form:

☐ A certified true copy of your duly executed connection agreement with the transmission licensee for your facility.
☐ A certified true copy of your duly executed market participant - market support services licensee agreement with the MSSL for your facility.
☐ A certified true copy of written authorisation/approval (if any) from the Authority for
  ☐ classification of your facility as an embedded generation facility for the purposes of (USEP+HEUC)/Nodal Price Neutralisation
  ☐ classification of your facility as a non-injecting generation facility for the purposes of net treatment on non-reserve charges
☐ An original duly completed Data Form for Generation Facility Registration required by the PSO for your facility.
☐ An original duly completed and executed Certificate and Undertaking (substantially in the form and terms prescribed in Appendix B of this application form) for your facility.

FOR EMC OFFICIAL USE

1. Assigned MNN number(s) for this facility ______________________________

   INFORMATION PROVIDED BY THE MSSL TO THE EMC

2. Respective RQM (as defined by MSSL) Id no(s) ______________________________

   2.1. Location of the facility ____________________________________________
G. COVENANT AND DECLARATION

We, the undersigned applicant, having read and fully understood the market rules, the terms of this application form, the applicable market manuals, the system operations manual, the Electricity Act, and any other applicable laws, codes, rules, procedures or policies that are relevant to or regulate the wholesale electricity markets (collectively the "Regulations"), and/or having had the benefit of relevant independent advice, hereby apply to register our facility either as a generation registered facility or a generation settlement facility as stated in this application form.

We hereby agree to be bound by, and to comply with, all the Regulations which may be applicable to us, our registration application herein, our facility and our participation in the relevant wholesale electricity markets.

We further hereby declare that the information provided by us (or on our behalf) in or in connection with this registration application is true, complete and accurate and not misleading or omitting any material particular (to the best of our knowledge, information and belief after having carried out all necessary due diligence to determine the same) and hereby covenant to be subject to any sanctions, penalties or orders as may be imposed by the relevant authorities/parties under the Regulations, in the event that such information is found to be untrue, misleading or inaccurate in any material particular.

We further hereby covenant to be legally bound by the relevant dispute resolution provisions under the market rules and any applicable market manual, in the event that this registration application is denied and a dispute arises from such unsuccessful application.

We confirm and acknowledge that the information provided by us (or on our behalf) in or in connection with this registration application may need to be disclosed, communicated or exchanged by the EMC to or with other parties, including but not limited to the Authority, the PSO and the MSSL, as necessary, desirable or expedient for the purposes of processing this registration application under the Regulations and we hereby consent to such disclosure, communication or exchange.

Appendix B

SAMPLE CERTIFICATE AND UNDERTAKING
[To be set out on the applicant’s letterhead.]

CERTIFICATE AND UNDERTAKING

To: Energy Market Company Pte Ltd
   (hereinafter referred to as the “EMC”)

We, [state name of applicant], refer to our Application Form for Generation Facility Registration dated [state date] for the registration of [identify the relevant generation facility here] (our Facility) as a [generation registered facility / generation settlement facility] under the market rules and applicable market manuals of the EMC (our Application).

Pursuant to our Application, we hereby confirm, certify and undertake to the EMC (with a view to the EMC relying upon our confirmations, certifications and undertakings herein in considering our Application) that:

1) we have (and we will continue to have through to, on and from the registration of our Facility by the EMC) operational control and authority over the Facility for the purposes of the market rules;

2) all our facilities and equipment to which our Application relates meet all applicable technical requirements under the market rules, the applicable market manuals and the system operation manual; and

3) we have adequate qualified personnel and organisational and other arrangements that are sufficient to enable us to perform all of our functions and obligations applicable to us as market participants under the market rules, the applicable market manuals and the system operation manual, including reliable services during normal and emergency situations, in respect of our participation in the wholesale electricity market.

Our confirmations, certifications and undertakings herein shall be governed by and construed in accordance with the laws of the Republic of Singapore. All italicised expressions used herein shall have the same meanings respectively ascribed to them in the Singapore Electricity Market Rules of the EMC.

Appendix C

Power System Operator (PSO) Data Form For Generation Facility Registration

[No Change]
ANNEX 3  Proposed Modification to the Market Administration Market Manual (Part 2) (with Marked Changes)
Based on the Singapore Electricity Market Rules

Application form for Generation Facility Registration

including explanatory notes.
IMPORTANT: Please read this carefully important information before completing this form. Italicised words and expressions used herein (but not otherwise defined herein) shall have the same meanings respectively ascribed to them in the Singapore Electricity Market Rules.

Why do you need to complete this form?
Under the market rules, if you are not a market support services licensee, you are not permitted to participate in the real-time markets or to cause or permit any physical service to be conveyed into, through or out of the transmission system unless you have been registered by the Energy Market Company Pte Limited (EMC) as a market participant, and your facility to or from which the physical service is to be so conveyed has been registered by the EMC as a registered facility, a commissioning generation facility or as a generation settlement facility in accordance with the market rules.

The EMC is licensed by the Energy Market Authority (the Authority) to operate the wholesale electricity markets (to which the real-time markets form a part) in Singapore. One of the EMC’s responsibilities is to manage the registration of facilities in the wholesale electricity markets. You must complete and submit this form to apply to have a facility registered by the EMC if you wish to convey any physical services into, through or out of the transmission system and that facility is required or permitted to be registered under the market rules:

- participate in the wholesale electricity market and/or;
- convey any physical services into, through or out of the transmission system.

Why did EMC develop this form?
The EMC has developed this form for applicants to apply for facilitate the relevant facility registration process described in the market rules. You should read the relevant sections of the market rules prior to completing this form. Please also refer to the EMC disclaimer at the end of this form.

Who is eligible to apply for registration?
You must be registered as a market participant before you are eligible to apply for registration of your facilities. If you are only granted conditional registration as a market participant, you may also apply for registration of your facilities, but your facilities will not be registered unless you become registered as a market participant within the relevant conditional registration deadline.

What are the types of facility registration?
The three types of registered facilities are:

- Generation registered settlement facility
- Generation settlement registered facility
- Commissioning generation generating facility (you need to complete a separate form for this type of registration).

This application form is to be used for application for registration of either a generation settlement facility if you have a generation registered facility or a facility of 1 MW or more but less than 10MW (as rated in its name plate) and you do not want it to be subject to dispatch by the Power System Operator (PSO).

You should register as a generation settlement facility only. If you wish to register your registered facility if you have a generation facility of 10MW or more (as rated in its name plate) and you want to subject it to dispatch by the PSO.

You should register as a commissioning generation facility. If you have a generation facility of 10MW or more (as rated in its name plate) undergoing commissioning tests, you should register as a commissioning generation generating facility.
**Generation Facility** if you have a generation facility of 1MW or more but less than 10MW (as rated in its name plate) and you wish to subject it to dispatch by the PSO whilst the facility is undergoing commissioning tests. Please use the Application Form for Registration of Commissioning Generation Facility Registration.

**Generation Registered Facility**

If all the generation facilities of a generating station together have an aggregate name-plate rating of 10 MW or more, all such generation facilities must be registered as either a single generation registered facility or two or more generation registered facilities in accordance with the market rules. A generation registered facility is subject to dispatch by the PSO. A generation registered facility shall at all times have a valid standing offer for each physical service that it intends to provide in the real-time markets.

**Generation Settlement Facility**

A generation settlement facility is registered for the delivery of energy only and is not subject to dispatch by the PSO. If all the generation facilities of a generating station together have an aggregate name-plate rating of 1 MW or more but less than 10 MW, all such generation facilities must be registered as either a single generation settlement facility or two or more generation settlement facilities in accordance with the market rules. But if any of such generation facility is to be subject to dispatch by the PSO, that generation facility must be registered as a generation registered facility instead.

**When will you know the outcome of your application?**

The EMC will notify you in writing of the outcome within 30 business days of the EMC being satisfied that receipt of your application meets all the requirements for generation facility fully completed registration under form or any further information or clarification requested by the EMC, whichever is the market rules, the applicable market manuals/slater (unless you and the system operation manual/EMC have agreed a longer time for this process). If your application is declined, the notification will identify why this was the case. A duly complete and accurately completed form will expedite EMC’s processing of your participant registration application within the above stated period.

**What should you do if you have more than one facility to register?**

Please fill in a separate forms of forms for each application for registration of a generation facility to be registered facility or generation settlement facility. You can. To do this, you may wish to download additional copies of the form more forms from the EMC website at: www.emcs.com.

**Is there an application fee for your application to register your facility?**

There is no application fee payable for your application to register your facility.
Summary of registration requirements for a generation registered facility (10MW and above or 1MW to less than 10MW and subject to PSO dispatch)

The key requirements in the process for the registration of your facility as a generation registered facility are outlined set out in the table below:

| A | Meet the EMC’s pre-registration requirements | You must be sure that |
|   |                                             | - your facilities and equipment meet all applicable technical requirements set forth in the market rules, any applicable market manuals or the system operation manual; and |
|   |                                             | - you are able to perform all the functions and obligations applicable to you under the market rules, market manuals or system operation manual. |
|   |                                             | If your facility is located outside of Singapore, the EMC may impose additional requirements for the registration of your facility. You must be sure you can satisfy all applicable technical requirements before submitting your registration application. The EMC may test and inspect your equipment to ensure compliance. Successful completion of these tests is a pre-condition for registration. You must also ensure you have adequately qualified staff and identify your dispatch coordinator, who is authorised to submit dispatch data for your registered facility. You can change your dispatch coordinator only with the EMC’s prior approval. |
| B | Meet the PSO’s requirements                  | You must complete the PSO’s Data Form for Generation Facility Data Registration Form meeting all the applicable technical requirements and attaching any required documents during submission. |
|   |                                              | The registration of your facility is subject to the PSO advising the EMC that such facility poses no threat to the reliability or security of the PSO controlled system. |
| C | Meet metering requirements Prepare and attach required documents | YouAs a pre-requisite for registration, you must attach; |
|   |                                              | - A copy of your connection agreement with the MSSL’s written confirmation to transmission licensee. |
|   |                                              | - Identification of the EMC that physical services to be provided by the MSSL is ready facility. |
|   |                                              | 1. A standing offer for each physical service to submit all settlement data required under be provided by the market rules for your facility to the EMC. |
| D | Prepare and attach required documents        | If the EMC is satisfied that you meet the requirements of a generation registered facility, we will register you as one. The EMC will advise the terms and conditions of the registration in an official notice to you. If your application is declined, the EMC will write to you stating the reasons. You must duly complete this application form in respect of your facility and... |
provide all required supporting documents with your application, including the following:

- A certified true copy of your duly executed connection agreement with the transmission licensee for your facility.
- A certified true copy of your duly executed market participant - market services support licensee agreement with the MSSL for your facility.
- An original duly completed Data Form for Generation Facility Registration required by the PSO (as set out in Appendix C of this application form) for your facility.
- An original duly completed and executed Certificate and Undertaking (in the form and terms prescribed in Appendix B of this application form) for your facility.

If your facility is located outside Singapore, you may have to meet additional the EMC requirements.

SAMPLE CERTIFICATE AND UNDERTAKING
[To be set out on the applicant’s letterhead.]

CERTIFICATE AND UNDERTAKING

To: Energy Market Company Pte Ltd

_________ (hereinafter referred to as the “EMC”)

We, [state name of applicant], refer to our Application Form for Generation Facility Registration dated [state date] for the registration of [identify the relevant generation facility here] (“our Facility”) as a [generation registered facility / generation settlement facility] under the market rules and applicable market manuals of the EMC (our Application).

Pursuant to our Application, we hereby confirm, certify and undertake to the EMC (with a view to the EMC relying upon our confirmations, certifications and undertakings herein in considering our Application) that:

4) we have (and we will continue to have through to, on and from the registration of our Facility by the EMC) operational control and authority over the Facility for the purposes of the market rules;

5) all our facilities and equipment to which our Application relates meet all applicable technical requirements under the market rules, the applicable market manuals and the system operation manual; and

6) we have adequate qualified personnel and organisational and other arrangements that are sufficient to enable us to perform all of our functions and obligations applicable to us as market participants under the market rules, the applicable market manuals and the system operation manual, including reliable services during normal and emergency situations, in respect of our participation in the wholesale electricity market.

Our confirmations, certifications and undertakings herein shall be governed by and construed in accordance with the laws of the Republic of Singapore. All italicised expressions used herein shall have the same meanings respectively ascribed to them in the Singapore Electricity Market Rules of the EMC.
